

Professional Summary

Senior Product Designer with 6+ years of experience designing consumer mobile apps and digital products across iOS, Android, and web platforms. Expert in end-to-end design, rapid prototyping, design systems, and high-fidelity UI. Skilled in user research and usability testing, leveraging both qualitative and quantitative data to transform complex problems into intuitive, high-impact solutions. AI-native designer who actively uses Lovable, Cursor, and Claude in daily workflows — having independently shipped a live React web app from zero to production in 10 days. Passionate about shipping real products fast, learning from users, and pushing the boundaries of what a designer can build with AI tools.

Expertise

Native Mobile | Strong UX Design | Figma (Expert) | UX/UI Design for Consumer Apps | iOS & Android Mobile Applications | End-to-End Design Process | Responsive Design (Web, Mobile, Native Apps) | Design Systems (Creation & Maintenance) | Wireframing, Mockups & Rapid Prototyping | User Research, Interviews & Usability Testing | Data-Informed Design & Rapid Iteration

Toolkit

Figma | Maze | Visual Studio Code | Cursor AI | Lovable | Claude | After Effects | Adobe Creative Cloud | HTML | CSS | Tailwind CSS | React | TypeScript | JSON | GitHub | Supabase | AI & Productivity Tools

Experiences

Founder, Designer & Developer (Personal Project) | Gatherr | Social PWA | Mar 2026 - Present

gatherr-one.vercel.app

- Designed and shipped a live social PWA in 10 days, owning the full product lifecycle from UX research and Figma design through frontend development and deployment.
- Built with React, TypeScript, Tailwind CSS, and Supabase; deployed via Vercel using a Figma MCP, Claude Code, and Cursor workflow.
- Collect ongoing user feedback through Discord to prioritize features, including real event listings and link sharing, iterating toward v2 based on real user needs. Conducted active user testing to prioritize critical features, optimize usability, and plan v2 based on real feedback

Native mobile UX Designer | Panasonic Well | Aug 2025 - Feb 2026

[Panasonic Well Case Studies](#)

- Led early concept explorations to finalize design solutions for two AI-powered mobile apps (family engagement and meal planning), creating interaction flows, wireframes, storyboards, prototypes, and high-fidelity designs in Figma while advocating for users and crafting accessible, consistent, and clearly articulated design solutions.
- Worked across AI chat-based interactions and image interpretation features for consumer products such as family task management and meal planning, exploring early concepts and translating complex AI behavior into intuitive workflows including conversational flows, confidence indicators, and exception-based interactions that informed product direction.
- Conducted qualitative user interviews, remote usability sessions, and Dscout studies across early product stages, using findings to inform interaction flows, prototypes, and MVPs, guiding strategic design decisions.

- Partnered closely with UX, product managers, engineers, researchers, and cross-functional stakeholders to align on requirements, present prototypes, gather feedback, and bring designs to life in ambiguous, zero-to-one product spaces.
- Designed refined UI experiences with a strong eye for typography, color, and illustration, applying thoughtful layout and iconography while contributing to a scalable design system—including component libraries, evolving guidelines, and visual standards—to support consistent zero-to-one product workflows.

Co-Founder and Sr. mobile Product Designer | LoopedIn | Jun 2025 - Present

[LoopedIn Link](#)

- Led end-to-end UX/UI design for a mobile progressive web app (PWA) focused on helping crocheters complete projects easily by transforming complex processes into intuitive, user-friendly experiences, grounded in mobile UX best practices, platform conventions (iOS and Android), and accessibility standards.
- Applied 100% user-centered design principles through extensive user research, competitive analysis, and iterative user testing with diverse crochet skill levels to gather qualitative and quantitative insights, driving actionable feedback and enhancing user satisfaction.
- Designed detailed user flows, wireframes, and high-fidelity prototypes using Figma.
- Created engaging animations and micro-interactions with Jitter to improve user engagement.
- Built and shipped a production PWA using AI-assisted development tools including Cursor AI, Lovable, and Claude — prototyping and iterating AI-powered flows at the speed of AI-assisted engineering teams.
- Collaborated closely with development partners to ensure scalable design solutions align with product goals and technical feasibility.

UX Designer | Prosp3r Ltd | Jun 2025 - August 2025

- Supporting UX/UI design of a desktop platform for Elixir engineers to present skills and connect with job opportunities.
- Collaborate with a fellow designer and a globally distributed team to refine user flows, design modals and interface components, and implement the shadcn/ui design system for accessibility and consistency.
- Use Figma for design and prototyping, and GitHub for cross-functional collaboration with engineers and product stakeholders

Sr. Native mobile UX Designer | TravelPass Group | Daybreak, Utah | Feb 2023 - Feb 2025

[Link to - Guide case study](#) [Link to - TravelPass web and mobile](#) [Link to - Cable Internal Tool](#)

- Led end-to-end UX/UI design for the TravelPass native mobile app over two years, driving user-centered design, research, and interaction design. Designed core transactional flows — including search, booking, checkout, and account management — and maintained a scalable design system for an intuitive user experience. Expanded key features, significantly improving overall user satisfaction. Spearheaded two major features — [Plan](#) and [Guide](#) — delivering mockups and rapid Figma prototypes. Conducted frequent usability testing, iterated designs with user feedback, and applied a growth mindset while staying current with industry trends.
- Collaborated with cross-functional teams across TravelPass web and mobile platforms, focusing heavily on UI approach and UX research. Led rapid prototyping efforts to validate designs and ensure responsive, intuitive user experiences. Applied user-centered design principles, interaction design, and maintained a consistent design system to scale across platforms.
- Redesigned CABLE , an internal tool, with heavy UX focus, reducing user friction by 80% and improving user satisfaction by 90%. Advocated for the design process by transforming complex workflows into simplified, scannable data-driven mockups and prototypes using Figma.

- Conducted user research to gather qualitative and quantitative insights, competitor analysis, and usability testing to inform data-driven design decisions; created journey maps, user flows, and interactive prototypes enabling rapid iteration and stakeholder collaboration.
- Maintained and enhanced a scalable design system across all designed products in Figma, incorporating reusable components and visual guidelines aligned with interaction design and information architecture principles.

Mobile UX/UI Designer | Polynesian Cultural Center | Laie, Hawaii | Jan 2023 - April 2023

[Link to - Polynesian Cultural Center Case study](#)

- Led end-to-end design processes for the PCC mobile app, from research and ideation through rapid prototyping to high-fidelity delivery and launch, demonstrating strong visual craft.
- Created user flows, wireframes, and interactive Figma prototypes using clear interaction design patterns and information architecture strategies to simplify the experience and improve usability.
- Increased user engagement by 50% and improved visual design quality by 90% through thoughtful UX enhancements that simplified user journeys, reduced friction, and delivered a responsive, mobile-first experience.
- Conducted competitive audits, user research, and usability testing to uncover market gaps and user needs, driving data-informed, future-forward design solutions supported by a scalable design system.

User Experience Designer | PLACE, Inc. | Draper, Utah | Oct 2021 - Feb 2023

[Link to - PLACE CRM case study](#) [Link to - PLACE case study](#)

- Independently led the end-to-end design for the Place CRM platform, creating data-driven designs such as dashboards, reports, and analytics. Managed user flows, wireframes, and high-fidelity mockups for this large-scale system while building and maintaining a comprehensive design system. Conducted user testing with cross-functional teams, which resulted in a 50% increase in user satisfaction. Throughout, I applied a strong focus on data-driven design decisions, leveraging insights —along with information architecture principles and interaction design—to create intuitive, scannable interfaces that enhance the overall user experience.
- Delivered user-centered design solutions with strong visual expertise across Place.com’s web and mobile platforms, serving a multi-sided market including real estate agents and homeowners.
- Designed Bluroof MyPortal and contributed to Brivity Home and Brivity Go native mobile apps, ensuring seamless, consistent user experiences across platforms and devices. Maintained and enhanced a scalable design system in Figma, incorporating reusable components and style guides to support multiple teams and ensure design consistency. Transformed complex workflows into simple, intuitive flows with clear information architecture and a clean UI, adding features that help users easily access their needs.
- Collaborated cross-functionally with product teams and key stakeholders, including real estate agents and homeowners, conducting usability testing and needs-finding research to inform data-driven design decisions.
- Utilized HTML and CSS skills to implement website updates and customizations for real estate agents, translating their requests (such as content changes, removals, and additions) into functional, responsive web pages. Collaborated closely with clients to understand their needs and deliver timely, accurate modifications that improved their online presence.

UX/UI Designer | Freelance | Salt Lake City, Utah | 2020 - 2022

[Link to - Costa Vida Fresh Mexican Grill mobile app](#)

- [2022] Designed end-to-end UX/UI and high-fidelity prototypes for Card Killer, a B2C app, enabling users to share multiple contacts via a single link. Built a scalable, consistent design system that supported rapid iteration, responsive design, and effective cross-functional collaboration with stakeholders.

- [2021] Collaborated with Velosimo at Visual Boston on web and mobile platforms for three months, creating animations, interactive prototypes, and developing scalable design systems using Figma to support fast-paced iteration, clickable prototypes, and strong stakeholder alignment.
- [2020] Redesigned the Costa Vida Fresh Mexican Grill mobile app, improving usability, visual design quality, and incorporating iterative feedback and user testing to deliver an enhanced user experience; project featured in professional portfolio.

Education

Master of Business Administration | Western Governors University

Bachelor of Science in Elementary Education | Utah Valley University
